

## **Imagine Optic's new US subsidiaries outperform expectations in their first year of operations**

San Francisco, CA and Orsay France, January 25, 2011 – Imagine Optic, a leading manufacturer of high-performance Shack-Hartmann wavefront metrology and adaptive optics solutions is proud to announce that sales of Imagine Optic, Inc and Axiom Optics, both created in December 2009, outperformed expectations with orders totaling over \$800K in their first year of operations.

“Our US subsidiaries that were launched at the end of 2009 have made remarkable progress in the North American market” states Samuel Bucourt, Imagine Optic’s CEO. “Founding Imagine Optic, Inc. has enabled us to strengthen our ties with existing US customers and develop new relationships on numerous high-profile projects. Axiom Optics, a division of Imagine Optic, Inc., has shown tremendous potential by developing solutions that blend our products with those offered by other suppliers of high-quality components to satisfy its growing list of customers.”

Philippe Clemenceau, Division Manager of Axiom Optics notes “Joining the Imagine Optic family has been a remarkable experience. The ability to offer clients custom-tailored solutions that include Imagine Optic’s wavefront analysis and adaptive optics technologies for applications including biological imaging, laser testing and optical metrology has proven itself to be a winning offer in this highly-competitive market.”

Imagine Optic, Inc and Axiom Optics will be present at Photonics West from January 25-27 2011 on stand 1431 where they will be providing demonstrations of their high-precision wavefront metrology and adaptive-optics solutions.

### More about Imagine Optic

Imagine Optic is Europe’s foremost provider of high-precision Shack-Hartmann wavefront sensors and adaptive optics products. The Company was founded in Orsay France in 1996 to respond to the need for high-precision/wide-dynamic range wavefront metrology and adaptive optics products. Primary applications include high-power lasers, life-sciences microscopy, optical characterization and industrial quality control. Imagine Optic currently employs over 20 qualified professionals in a variety of fields and is represented internationally by its extensive distributor network.
